Welcome back to a brand new school year! We are off to a great start so far in 7th grade! We have been very busy filling our minds with new information! In science the students were able to make plant and animal cells out of clay, which I have kept in order for you to see them at some point. We also did a weeklong experiment involving an egg to show the importance of the cell membrane in a cell. Ask your student what the different results were for the different liquids that we used. In religion, we have been learning how Jesus was like us and why it is important and what it means to be a good friend. As you know on Tuesday's church has adoration all day, I plan on trying to make it over to church at least twice a month, whether it is just for 10 or 15 minutes. I have, An Hour with Jesus, prayer book for each student but if they have a prayer book at home in which they like to use they may bring it in. Testing week starts at the end of this month. If you would like to bring in snacks or a drink for the class during this time, please let me know. I do have a few days open. If you have any questions throughout the school year please do not hesitate to contact me. My email is patkee@sjgschool.org and I will get back to you as soon as possible.

Have a wonderful day!

Miss Patke

Important Dates

- September 4, 2015- Jeans Day for filling tab jar.
- September 7- NO SCHOOL!!
- September 8- Blessed Mother Mary Birthday
- September 21-25- Testing Week
- September 23- Progress Reports
