

# TECHNOLOGY NEWS

March, 2016

## Coding and Keyboarding

We will continue to keyboard and CODE throughout the school year.

Each class will also be doing various projects regarding Lent and St. Patrick's Day. Also, projects that reinforce classroom subject matter.

### Server News

The new Server is up and running and Grading Software is installed so we are back to electronic Progress Reports and Report Cards. Thank you all for your patience and under-

standing during the down time between Servers.

The  
Season  
of  
Lent

## Technology Misconceptions

Software compatibility issues keep arising so I want to clear the air. Although school's edition of Microsoft Office is 2003 we are able to open any program done in a later

version. I explain this to the students but I continuously hear from students and/or teachers that we can't do that. So please keep that in mind if your child tells

you they can not work on something at home because it won't open at school. Unless the file is corrupt we can open it.

### Special points of interest:

*If you have ink cartridges to get rid of please send them to the office and I will give them to CartridgeWorld for a credit to our school account.*
