

Technology

December 2018

Keyboarding

Students in grades 3-8 continue to use typing.com for keyboarding and as always students are welcome to practice at home. Each student has their own username and password and need to login to keep track of their progress.

Grades K-2 use ABCYA & Dance Mat Typing for keyboarding.

Software

The following are some of the software programs that students use throughout the school year: Microsoft Office-Word, Publisher, Power Point, Excel, KidPix, Pivot Animator.

Grades 3-8 use Google Docs also.

Coding

Students will continue to code using code.org and scratch.mit.edu. Grades 7 & 8 will build Legos and code using Wedo 2.0 Lego kits on loan from St. Bridget. We are hoping to collaborate with St. Bridget's 6th grades on a day of coding and Legos in December.
